Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-5, drawn to a propellant container, classified in class 102 subclass 69.

Group II. Claim 6, drawn to an internal combustion operated setting tool, classified in class 227, subclass 9.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as a projectile used as a weapon (i.e. missile). Although Applicant has provided language regarding a specific use of the propellant container of Group I, the propellant container is not limited to such use. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Alexander Zinchuk (Reg. No. 30,541) on March 23, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
